

Putting California's Children First

- We represent more than 2,500 pediatric subspecialty physicians in California
- We are advocates for children with complex healthcare needs
- We fight to increase quality and access to life-saving and life-enhancing healthcare
- We work to provide all catastrophically and chronically ill children with needed specialty medical care
- We seek to preserve and strengthen the quality of care

The Children We Work With

- Are chronically or catastrophically ill
- Suffer from a broad range of pediatric conditions including cancer, heart disease, cystic fibrosis, and diabetes
- Need pediatric specialists to take care of their complex healthcare needs
- Require immediate access to pediatric inpatient and outpatient care, treatments, tests, and therapies
- Depend on the California Children's Services Program for access to life-saving services
